# M.B.A. (Semester-II) Examination PRODUCTION AND OPERATIONS MANAGEMENT <br> Paper-MBA/206 

Time : Three Hours]
[Maximum Marks : 70
N.B. :- (1) All questions are compulsory.
(2) Figures to the right indicate marks.
(3) Use of scientific calculator is permitted.

## SECTION-A

1. (a) What is Plant Layout ? Discuss planning and analysis methods for Plant Layout. 14

## OR

(b) What is production and operations management? Explain in brief scope of production and operations management.

## SECTION-B

2. (a) What is production planning and control ? Elaborate.
(b) There are seven jobs to be processed on two machines $M_{1}$ and $M_{2}$ in order $M_{1} M_{2}$. Find optional sequence and minimum elapsed time and also find the idle time on machine $\mathrm{M}_{2}$.

| Job $\rightarrow$ |  | A | B | C | D | E | F | G |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Machine | $\mathrm{M}_{1}$ | 6 | 24 | 30 | 12 | 20 | 22 | 18 |
| (Time in hours) | $\mathrm{M}_{2}$ | 16 | 20 | 20 | 13 | 24 | 2 | 6 |

OR
(c) Discuss various types of Industrial Hazards.
(d) James Bearing is committed to supply 24000 bearings per annum to M/S Duro Fans on a steady daily basis. It is estimated that it costs 10 paise as inventory holding cost per bearing per month and that the setup cost per run of bearing manufacture is Rs. 324.
(i) What is optimum run size for bearing manufacturer?
(ii) What should be the interval between the consecutive optimum runs?
(iii) Find out the minimum inventory holding cost.
3. (a) Explain the concept of Total Quality Management.
(b) A production manager at a light bulb plant has inspected the number of defective light bulbs in 10 random samples with 30 observations each, as follows :

| Sample | Number <br> Defectives | Number of observations <br> in sample |
| :---: | :---: | :---: |
| 1 | 1 | $\frac{30}{30}$ |
| 2 | 3 | 30 |
| 3 | 3 | 30 |
| 4 | 1 | 30 |
| 5 | $\frac{5}{1}$ | 30 |
| 6 | 1 | $\frac{30}{30}$ |
| 7 | 1 | $\frac{30}{30}$ |
| 8 | 17 | $\frac{300}{}$ |
| 9 |  |  |
| 10 | Total |  |

(i) Find out Center Line of the chart.
(ii) UCL
(iii) LCL .
(c) Explain the concept of Capacity Planning.
(d) In a factory producing spark plugs the number of defectives found in inspection of 20 lots of 100 each, is given below :

| Lot <br> No. | No. of <br> defectives | Lot <br> No. | No. of <br> defectives | Lot <br> No. | No. of <br> defectives |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 5 | $\frac{8}{9}$ | 3 | 15 | 3 |
| 2 | 10 | 9 | 3 | 16 | 4 |
| 3 | 12 | 10 | 5 | 17 | 5 |
| 4 | 8 | 11 | 4 | 18 | 8 |
| 5 | 6 | 12 | 7 | 19 | 6 |
| 6 | 4 | 13 | 8 | 20 | 10 |
| 7 | 6 | 14 | 2 | - | - |

Construct appropriate control chart and state whether the process is under control.
http://www.sgbauonline.com/

## SECTION-C

4. (a) Explain various models of inventory. 7
(b) State various objectives of store management. 7

OR
(c) Describe various equipments of handling material. 7
(d) Elaborate the objectives of purchase management. 7

## SECTION-D

5. The following data is available for a machine in manufacturing unit.

Number of hours worked per day 8
Working days per month 25
Number of operators 1
Standard time per unit of production
Machine Time 22 min
Operator Time 08 min
Total Time/Unit 30 min
(i) If a plant is operated at $75 \%$ efficiency and the operator is working at $100 \%$ efficiency, what is the output per month?
(ii) If the machine productivity is increased by $10 \%$ over the existing level, what will be the output per month ?
(iii) If the operator efficiency is reduced by $20 \%$ over the existing level, what will be the output per month, if the plant is operated at $75 \%$ efficiency ?
